

Welcome and thank you for visiting 5012 Boulder Creek Lane. We're so grateful that you are taking time to imagine your life here. It's just what we did when we moved to this area from Cary about 5 years ago to be closer to our community; we instantly fell in love with this property and the neighborhood. This is a very welcoming and active neighborhood with a wonderful mix of young, growing families and others that have been here for many years. We have poured time, energy, and resources into making this house perfect for our family of six, for hosting fun times with our friends and our children's friends, and for out-of-town guests. Now that we are transitioning to another state, we find it quite difficult to leave!

There are endless intentional space and design features that we love about this house! We designed the home to allow people to be comfortable and social and yet also have their own space where they could retreat when needed. Three of the six bedrooms have private ensuite bathrooms. Two of the other bedrooms have private toilets and vanities with a shared shower between them. Beyond it being a perfect space for our family as the kids grew, we purposefully designed it to very easily accommodate all of our adult children with their own families for holiday visits as well.

As for us, we have learned that we just can't live without a first floor Primary Bedroom with a cozy bathroom retreat. If you have a need, the bedroom at the top of the stairs can certainly act as a second story primary bedroom also. We will totally miss the spacious and plentiful closets and easily accessed storage spaces throughout the house. Our teens with rigorous high school demands put high value on having their own private attached sitting/study rooms which many of the bedrooms offer.

The Kitchen is light and bright with a nook surrounded by windows which give view to the lush green backyard. Of course, the Kitchen is always the place where friends and family gather, so we created a cozy and close Keeping Room to make entertaining easy. Two of our favorite elements of the Kitchen are the extra-large walk-in pantry with 9ft ceilings and the large stand-alone fridge and freezer combo. We love the storage space each of those give us which makes cooking a pleasure! It's easy to keep ingredients on hand for making tasty scratch made meals.

Another one of the best rooms in this home is the Great Room on the first floor. Our kids and their friends gather there for movies and games while the adults enjoy the Keeping Room nearby. The second floor has an additional Family Room for needed extra space when multiple kids are entertaining friends on the same evening.

In addition to the amazing and social community of Boulder Creek, you will have over 2 acres to enjoy all to yourselves. We love plants and had the property professionally landscaped to bring in the beauty of a variety of shrubs and flowers that surprise and delight your senses. Without sacrificing the surrounding woods, we expanded the yard to allow for plenty of space to run and play. Our whole family has enjoyed endless time outside gardening, playing in the woods or at the creek, and hanging with friends by the outdoor fireplace. Had this been our permanent home, one of our plans would have been to add a pool because that can be done without sacrificing a very large backyard...the best of both worlds!

We could go on and on about our love for 5012 Boulder Creek Lane, and in your time visiting, we hope you've come to love and appreciate this special property. Thank you for stopping by!
